PROJECTS/RESEARCH

User Mobile App Interaction & Retention Analysis Jul 2025
Data Analyst (Personal Project) Incheon, South Korea
•Analyzed 100,000 user interaction logs from 60,471 unique users using Python (Pandas, SciPy, Plotly) to identify onboarding issues and user drop-off points.
•Identified an 85% funnel drop-off at the initial click stage and a D1 retention rate of 3.0%, highlighting key areas for product and user experience improvement.
•Conducted weekly cohort analysis and user segmentation to monitor retention trends and identify differences in user behavior.
•Developed 10+ interactive dashboards and visualizations and translated analytical findings into 5 quantified business action items for executive reporting.

Fitbit User Retention & Behavior Analysis Jun 2026 - Jul 2026
Data Analyst (Personal Project) Incheon, South Korea
• Analyzed user activity and device wear-rate data using Python and MySQL 8.0 to identify behavioral patterns and potential user retention risks.
• Identified that 48% of users (14/29) experienced an activity decline of ≥30% between Day 7–9 while maintaining device usage.
• Developed an A/B testing framework and personalized re-engagement strategies targeting at-risk users between Day 5 and Day 7.
• Authored 63 SQL queries using CTEs and Window Functions (AVG OVER, LAG) to calculate baseline metrics and 7-day moving averages.

EXPERIENCE

GAOTek Inc. Jul 2023 – Oct 2023
Business Development Intern
• Built a target database of 100 B2B client companies using CRM systems to optimize outreach efficiency.
• Executed 30+ targeted email campaigns and follow-ups daily, maintaining organized prospect information and tracking partnership opportunities.
• Supported business development activities through structured data management, customer research, and continuous follow-up.

Research and Business Development Center Sep 2022 – Dec 2022
Data Analyst Intern Rexburg, ID

• Collected, cleaned, and analyzed regional hospital data to identify business trends and generate strategic insights..
• Transformed historical performance data into structured reports and visualizations to support business decision-making.
• Organized analytical findings into actionable reports for executive review.
